

2016 Land Disposal Maps

Adopted by City Council: 2/17/16

Map Designations

Available – Available to purchase, lease, or lease with an option to purchase.

Not Available – The identified property is NOT available for sale. A response will be sent to the interested party stating that the parcel is not available for purchase. These parcels include protected watersheds, substandard lots, snow dumps, and other lots used by the city.

Tidelands – All requests to purchase tidelands will be reviewed by the Planning Commission as they are received. The Planning Commission will make a recommendation on disposing of the tidelands to City Council.

Leased – These are lots currently leased to a business or government entity by the City and are not available during the lease term. There are leases that are short term and renew every two years and others are long term leases with substantial improvements on the property. At the end of the lease term the property becomes available for disposal.

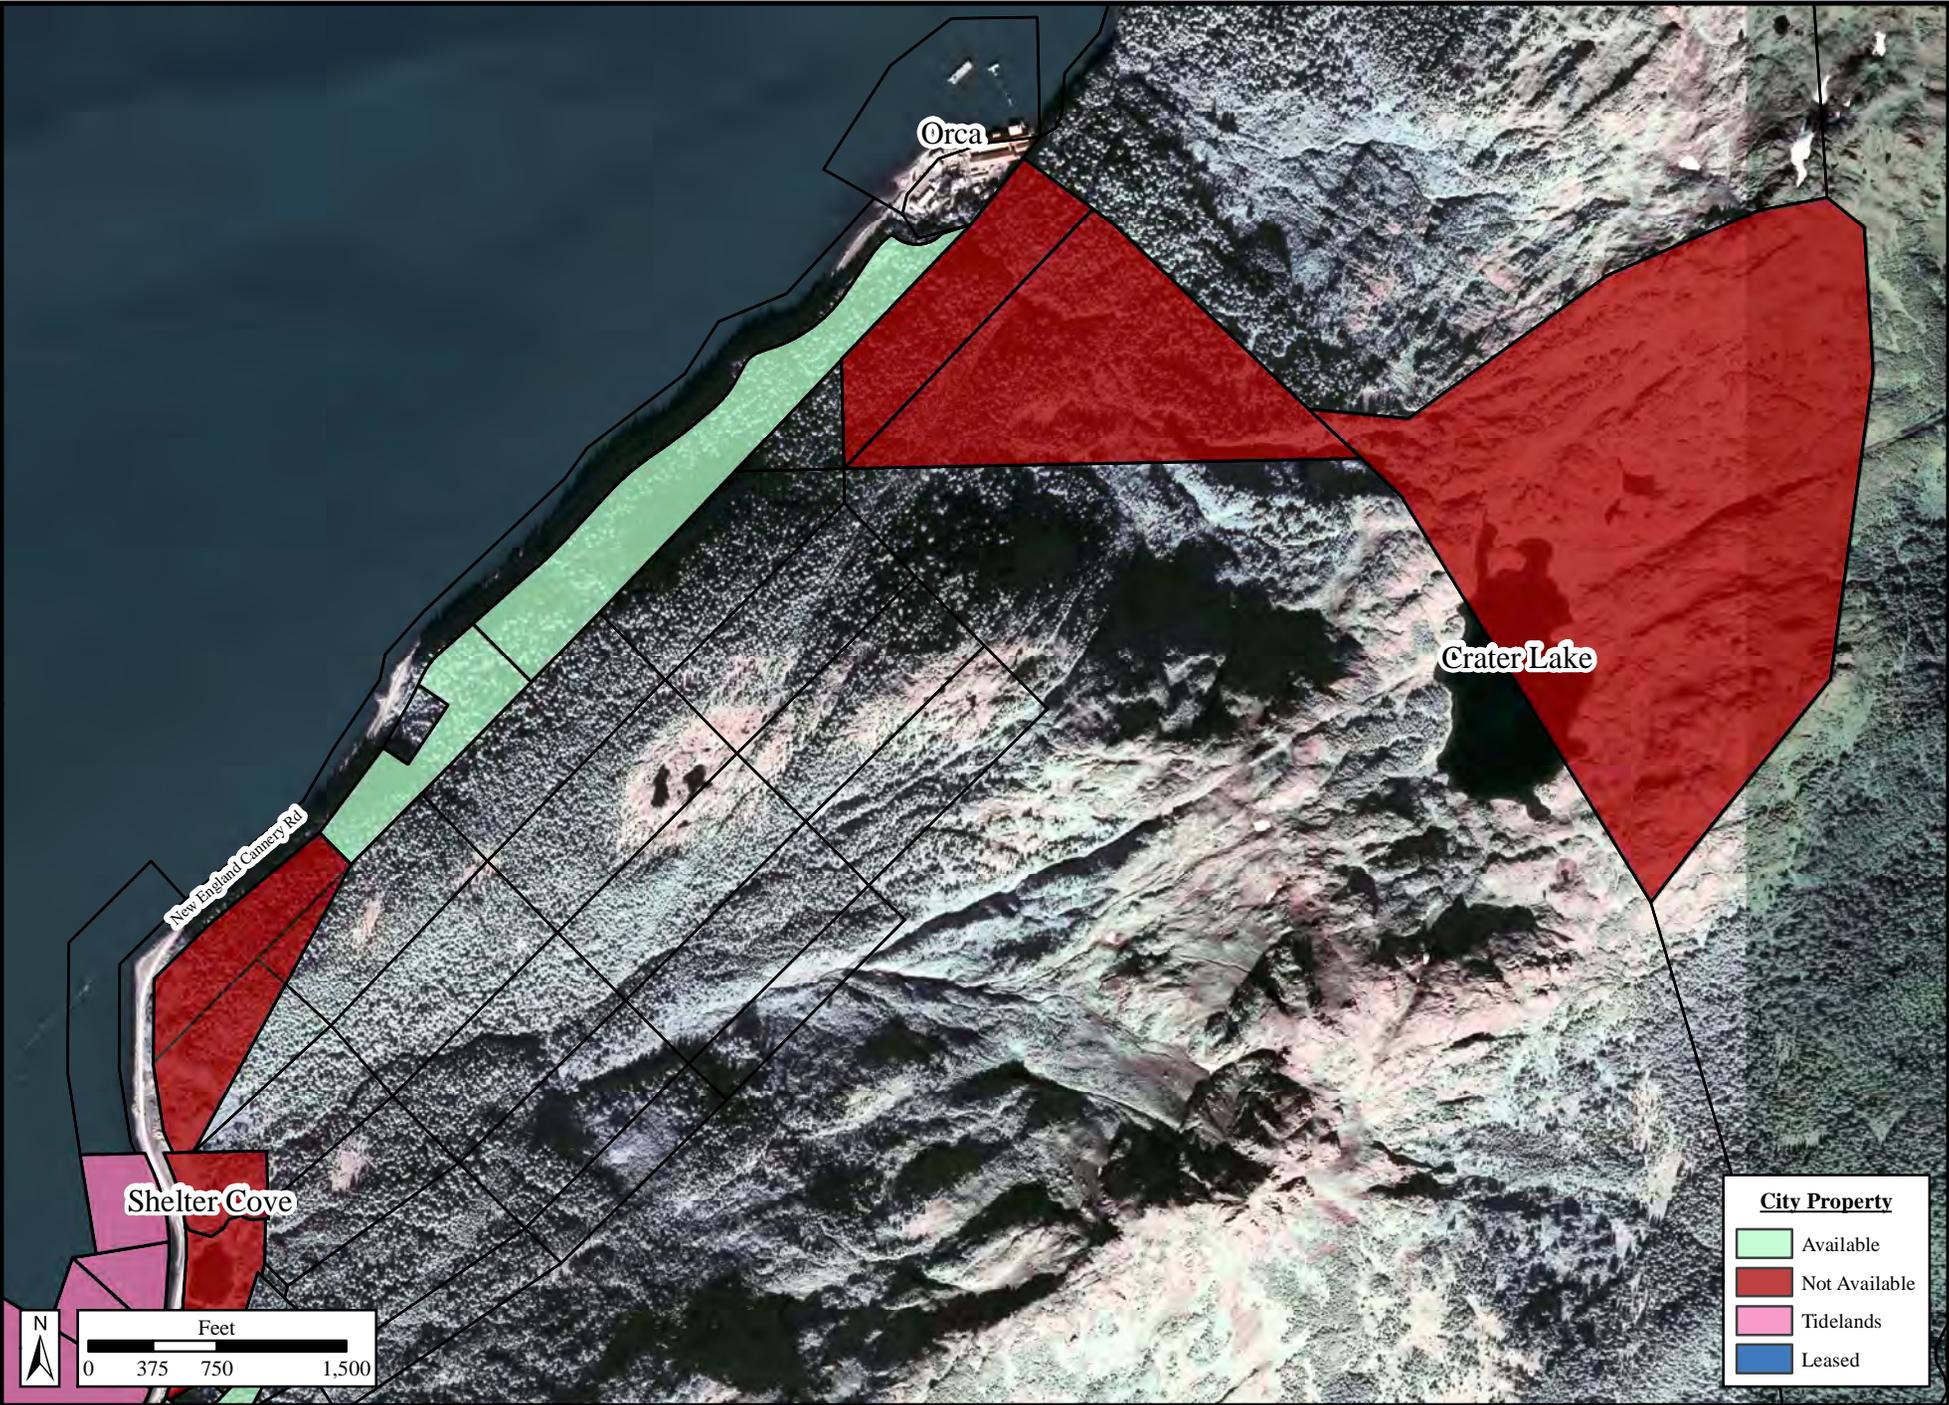

Final Update Policy

Maps will be updated on an annual basis by the Planning Department staff, reviewed by the Planning Commission, and adopted by City Council. This update process will begin after each new year with updated maps being presented to the Planning Commission in January.
